SUMMARY

Currently a student and freelance web developer with one years of experience in web design and development. During this time, I have acquired skills in technologies such as Figma, React and TypeScript. I specialize in creating functional and aesthetically appealing websites for businesses, applying design principles and best programming practices.

EXPERIENCE

LogisNay S.A de C.V

Web Page • 2023

Development of a static website for the logistics company LogisNay S.A de C.V, using HTML, CSS and JavaScript technologies. The design was done in Figma, ensuring a coherent and attractive visual presentation. The page offers detailed information about the company's services and facilitates communication with users through a contact form, implemented with PHP for sending emails.

PROJECTS

Social Media Project

Web Page • 2024

Development of a social network project using React, Tailwind CSS and Firebase. The page allows users to register and log in with Google account, create posts and give likes.

Portfolio

Web Page • 2024

Development of a dynamic professional presentation oriented website, designed in Figma and built using React and TypeScript technologies. The site facilitates contact with potential clients or employers and implements modern features such as the option to switch between light and dark mode, thus improving the user experience and adapting to their viewing preferences.
